

**Forest North Drainage Improvement Project
September 2017**

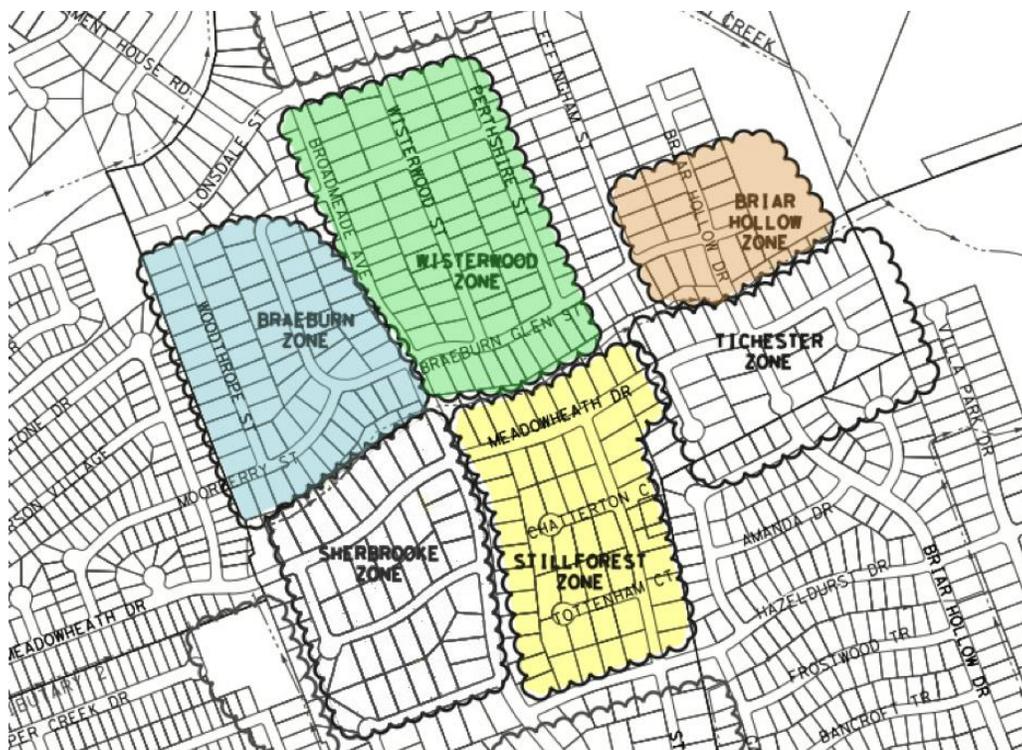

Dear Neighbor,

You are receiving this email because you signed up for regular updates on the Forest North Drainage Improvement Project, or you are located within a zone where construction work is taking place or is soon to begin.

This week DeNucci Constructors, LLC continued asphalt patching this week for trench repairs in the Stillforest Zone. They also continued concrete driveway construction and they completed sidewalk construction and opened to pedestrian traffic along Broadmeade Avenue in the Wisterwood Zone. They also completed placing flex base for trench repairs in the Wisterwood Zone, and they completed excavation for the trickle channel in the Briar Hollow Zone. For the next two weeks, DeNucci Constructors, LLC will complete asphalt trench repairs in Stillforest Zone. They will complete concrete driveway construction, continue asphalt trench repairs and will continue spreading topsoil in the Wisterwood Zone. They will also begin asphalt trench repairs in the Wisterwood Zone. They will complete concrete driveway construction and trickle channel construction in the Briar Hollow Zone.

There will be intermittent lane/road closures on Braeburn Glen Street and Broadmeade in the Braeburn Zone and intermittent lane/road closures on Kensington Street, Broadmeade Avenue and Braeburn Glen Street in the Wisterwood Zone. There will be intermittent lane/road closures on Braeburn Glen Street and Briar Hollow Drive in the Briar Hollow Zone.

The Braeburn (blue), Briar Hollow (orange), Stillforest (yellow) and Wisterwood (green) zones are highlighted in the image below. A larger map of the neighborhood and the work zones may be found [here](#).

Members of the construction team have made or will make door-to-door visits prior to actual construction in each zone. Vehicles parked on the street may need to be relocated while work occurs. Please continue to visit the [project website](#) for updates.

Wisterwood and Briar Hollow zone Residents:

Residents in the construction area have received notifications about the project and a door hanger regarding homeowner items in the right-of-way. If you wish to preserve these items (custom mailboxes, landscaping, planters, trees, irrigation systems, etc.), it is suggested you begin removing them now from the right-of-way. If homeowner items are not removed by the time construction begins, then the contractor will consider these items left for refuse.

Mailboxes: Mailboxes in the path of drainage work will be removed and replaced with standard units. We are in close communication with the post office to ensure there is no disruption of mail service.

Driveways: The regrading of channels and replacement of driveway culverts will require the reconstruction of some driveways. Driveways will be accessible by the end of each workday. Full driveway repairs will be made upon completion of the entirety of the work at each property. Notice will be provided to homeowners and residents at least 48 hours prior to any driveway access interruptions.

Irrigation Systems: Irrigation systems in the path of drainage work will be removed, capped at the right-of-way line and will not be replaced.

Questions, Subscribe to Email Alerts and Project Webpage

If you have any questions regarding this information, please contact our Public Involvement Team by calling (512) 943-1195 or emailing roads@wilco.org. All project materials and updates, including any lane or road closures, will be posted on the Forest North Drainage Improvement Project page of the Road Bond website. We encourage you to sign up for news and updates under the “Subscriptions” tab.

All work mentioned above is contingent upon weather conditions.
