

Williamson County Road 366
From FM 397 (Carlos G. Parker Boulevard) to Chandler Road
PROJECT INFORMATION SHEET

Why Improvements are Needed

Williamson County and the City of Taylor are collaborating to plan improvements to County Road (CR) 366 to improve safety and mobility.

Project Overview

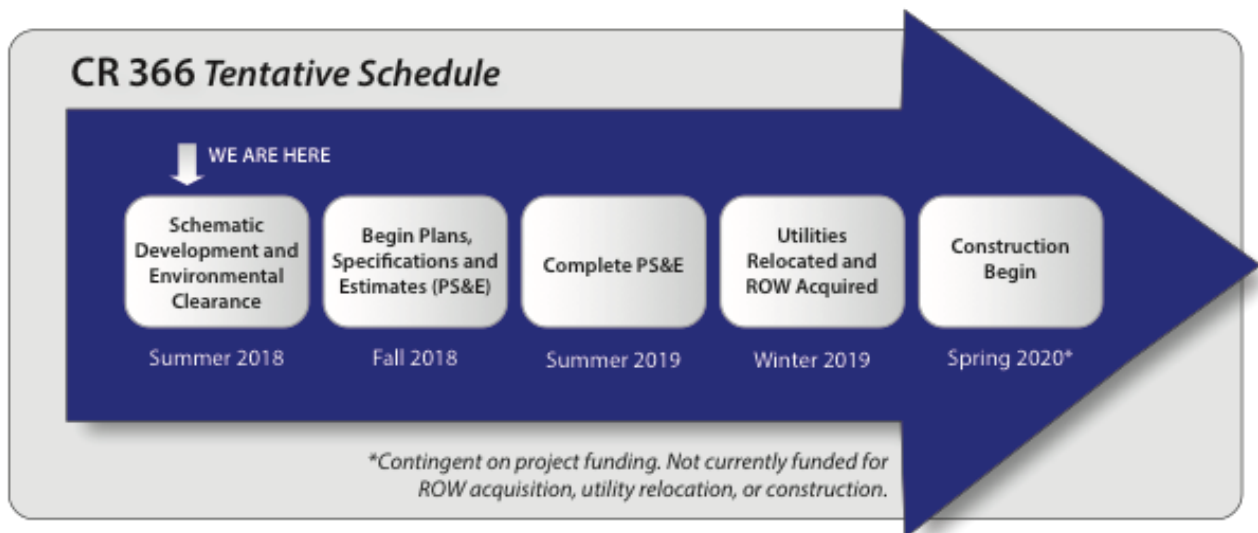

The CR 366 study limits are from FM 397 (Carlos G. Parker Blvd.) to Chandler Road, a distance of approximately 1.4 miles, through both the City of Taylor limits, and City of Taylor Extra Territorial Jurisdiction (ETJ).

The existing roadway is two-lane (one lane in each direction) with no shoulders, open ditch drainage, culvert stream crossings, and multiple utilities in the corridor. Existing right-of-way is approximately 50 feet.

The proposed facility is being planned as a four-lane divided roadway with a continuous center turn lane and shoulders, consistent with the Williamson County Long Range Transportation Plan. The project anticipates an estimated 120'-140' Right-of-Way will be needed, and will include drainage improvements, improvements to intersections at Carlos G. Parker Blvd., CR 367, CR 369 and Chandler Road. The study also includes:

- A proposed typical section based on the combined criteria of the City of Taylor and Williamson County
- Drainage improvements of the existing ditches and culverts
